

S360-C – Mounting/Hanging via Four Eyelets

Overview

In addition to the standard Carbon Fiber Yoke and the Short Yoke, it is permissible to hang an S360-C horizontally via the four eyelets on the top and bottom feet. Attach an appropriately rated safety cable to each eyelet. Four safety cables are required in total. Secure the opposite end of each safety cable with one appropriately rated shackle to form a single hoist point.
